**Proposal**

**Is this objective for the OAE is good for you ?**

Started by Draft · Closed 2 years ago

A suite of interoperable tools (olisb) easy to use, install, configure and contribute to (lynn). This ecosystem will enable :

- the emergence of open, inclusive economic and social systems (greg).
- connections between people who build and use open systems (greg).
- transparent and decentralised collaboration (olisb).

# Loomio

**Simon Grant (Cetis LLP)** 👎 Disagree

Not much rewording would be needed to get the concepts in good enough order for me.

**Tiberius Brastaviceanu** 👍 Agree

**Tibor Katelbach** ✋ Abstain

I agree with Bob , these points are part of what is the OAE but I think there's much more to it, like experimenting new types of open and horizontal governance, building an OCDB:Open Common Database )based on aggregations of multiple sources...++

**James Lewis** 👎 Disagree

Contains no actionable text - could be the definition of any tech soc. ent. As it's generic and broad it could not be used to facilitate e.g. goal definition, tasks, membership decisions or organisational structure.

**Bob Haugen** ✋ Abstain

I am abstaining because it's 3 to 3 and I don't want to tip the balance. I don't think we have enough unity yet to publish a joint statement, though.

**Oli SB** 👎 Disagree

For the reasons made in my comments, and Simon's...

**Jim Whitescarver** 👍 Agree
