I kindly urge all to document their edits; if not, you risk having your info removed. For starters, unless you have a formall poll showing that many Marylanders hate being called Southern, it has to go. Blanket statements such as the South has poor schools falls in the same category. New Wiki users should take a moment to read policies on good faith editing, non-point-of-view statements, and removing bias, etc.... [WillC](#) 00:17, 2 May 2006 (UTC)

I agree that the north/south cultural conflict section of the article needs to be better sourced. On the other hand, it's important to include a discussion of Maryland's cultural identity. Of course Wikipedia's NPOV policy needs to be followed throughout, but there is truth to the statement that many Marylanders resent being called Southern. There is also truth to the statement that some people in Maryland consider their state a part of the South. What the article needs is a neutral, sourced discussion of the views of Marylanders, but it would be a disservice to the article and to Wikipedia as a whole to exclude a discussion of the issue. When I get the chance (hopefully in the next few days) I will make an attempt to find sources for an NPOV discussion of Maryland's cultural identity. [NoIdeaNick](#) 17:36, 3 May 2006 (UTC)

You have no definite proof that any Marylander resents being grouped as Southern. [WillC](#) 20:08, 3 May 2006 (UTC)

I have lived in Maryland my whole life and I can tell you there are plenty of Marylanders who resent being called Southern. But you don't have to take my word for it. That's why Wikipedia has verifiability and NPOV policies. Considering how commonly (in my experience) Marylanders consider themselves non-Southern, I'm sure it has been written about. When I get a chance, I will hunt down some of these writings and write an NPOV section for the article. The question of whether Maryland is truly part of the South culturally is beside the point. All that matters is having an NPOV discussion of those views. [NoIdeaNick](#) 20:18, 3 May 2006 (UTC)

Agreed. I'm a Marylander, who got into vicious arguments with a Bostontonian with the same POV "commonly shared" (Maryland = the south because Mason Dixon hurr hurr). Basically I believe that defining it as the Mason Dixon line is

Ex. Find
calculator
 $\tan^{-1}(\frac{12}{5})$ in
rad to 2 d.p.

$$\tan \theta = \frac{12}{5}$$
$$\text{So } \theta = \arctan \frac{12}{5}$$
$$\text{So } \sin(\arctan \frac{12}{5}) = \sin \theta = \frac{12}{13}$$

$$5^2 + 12^2 = c^2 \quad c = 13$$
